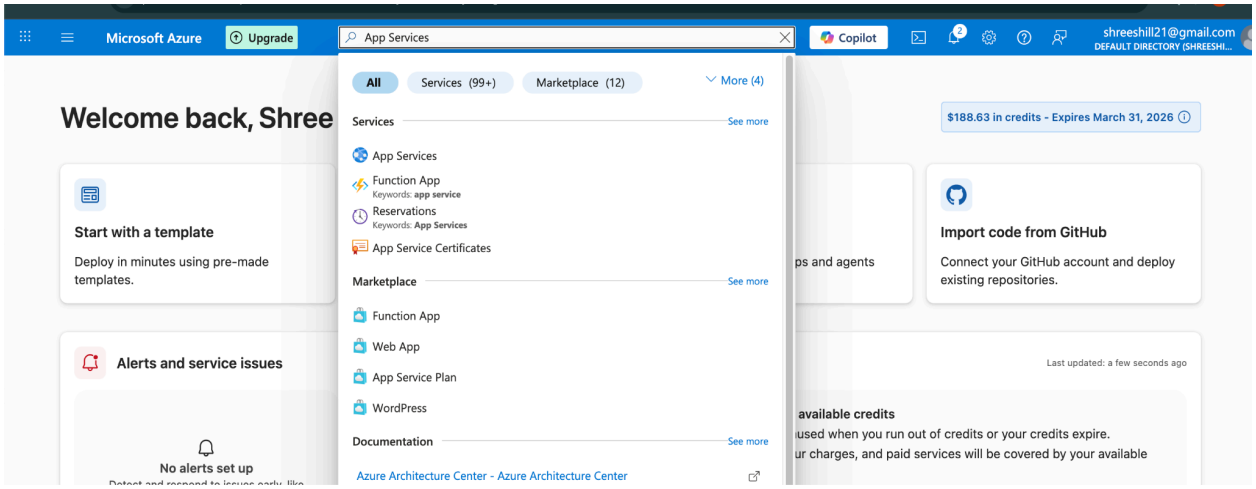
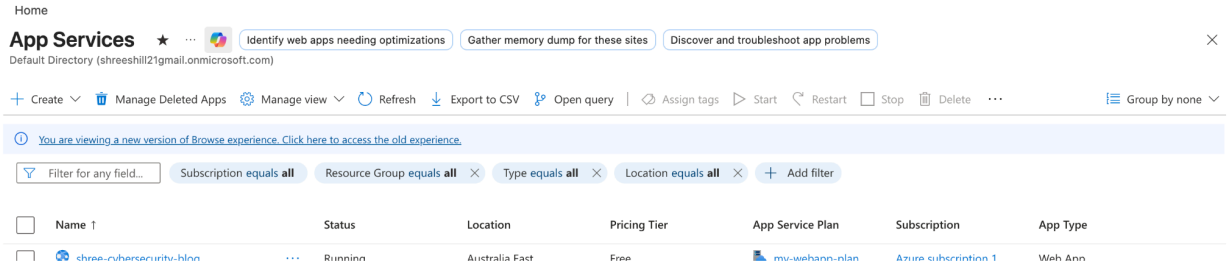
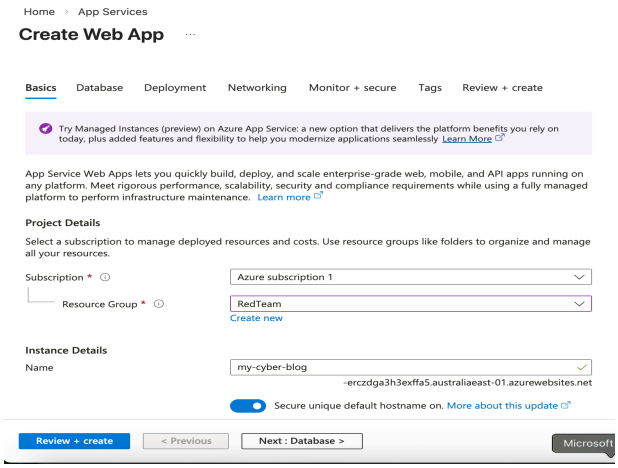
Day 1 - Web Development

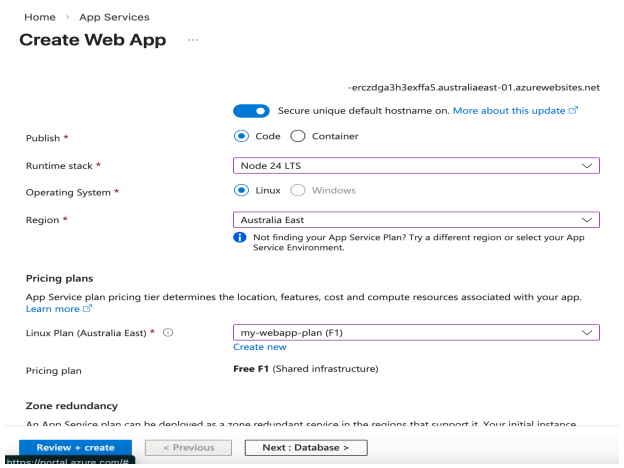
First, I signed into my already created free tire Microsoft account and choose App Service to create a webapp where I can deploy and run my code.



Day 1 - Creating Web App







Home › App Services

Create Web App

Region * Australia East

Not finding your App Service Plan? Try a different region or select your App Service Environment.

Pricing plans

App Service plan pricing tier determines the location, features, cost and compute resources associated with your app. Learn more

Linux Plan (Australia East) * my-webapp-plan (F1)

Create new

Pricing plan **Free F1** (Shared infrastructure)

Zone redundancy

An App Service plan can be deployed as a zone redundant service in the regions that support it. Your initial instance count will be set based on your zone redundancy configuration. To ensure you'll be able to enable zone redundancy at any point in the lifecycle of your app, enable zone redundancy now. You can decrease the instance count after the App Service plan is created. Learn more

Zone redundancy

Enabled: Your App Service plan and the apps in it will be zone redundant. The minimum App Service plan instance count will be two.

Disabled: Your App Service plan and the apps in it will not be zone redundant. The minimum App Service plan instance count will be one.
